Prospective Plantings for Delaware

DOVER, DE --- The Prospective Plantings report provides the first official, survey-based estimates of U.S. farmers' 2021 planting intentions, according to Shareefah Williams, state statistician of the USDA's National Agricultural Statistics Service, Delaware Field Office. NASS acreage estimates are based on surveys conducted during the first two weeks of March from a sample of more than 78,000 farm operators across the United States.

Delaware's 2021 key findings in the report are:

- **Corn** planted area for all purposes is estimated at 170 thousand acres, down 6% from last year.
- **Soybean** planted area is estimated at 165 thousand acres, up 10% from last year.
- **Barley** planted area is estimated at 21 thousand acres, unchanged from last year.
- **Winter Wheat** area planted is estimated at 60 thousand acres, down 20% from last year.
- **Hay** area harvested is estimated at 14 thousand acres, unchanged from last year.
